AN EXAMPLE OF HOW A CUSTOMIZED DISPLAY IS MADE **MADE**

定制案例

01

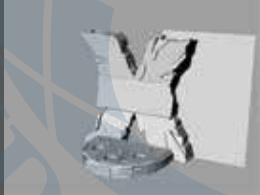

The idea comes from our client who needs an ice feeling X shape display to show his products.

了解客户的需求与想法

02

The most difficult and challenging part here is how we can fulfill customer's request of the real ice effect in 3D drawing.

通过3D建模实现客户构思

03

To make a gypsum mold according to the computer drawing is a step to realize it from paperwork to a real thing! Every cut and carving will end in a different result!

模具与样品开发

04

Finally with the LED light built in and shining though, we get a very icy display that satisfy our customer a lot!
