TECHNICAL INFORMATION

Light Strip Specifications

Model:	WJ-LLS-5050-60D-RGB-12V/24V
Color:	RGB(3IN1,4 wires)
CRI:	Ra>90
FPCB:	10mm white
Cutting:	3 LEDs/6 LEDs (5cm/10cm)
LED Type & QTY:	SMD5050 60pcs/m
Power:	16W/M
Packing:	5m per reel
Voltage:	12V/24V

Driver Require

1 Meter	> 20W
2 Meters	> 40W
3 Meters	> 60W
4 Meters	> 80W
5 Meters	> 100W

UV Resistant

Saltwater Resist.

Flame Resistant

Ambient Temp

■ DESCRIPTION

An LED strip light is a flexible circuit board that is populated with LEDs that you can stick almost anywhere you want to add powerful lighting in a variety of colors and brightnesses. LED strip lights are flexible and can be bent vertically up to 90 degrees. There are 5 great spots for LED strip lights around your home: 1. Under cabinets 2. Along toe kicks 3. Under shelves 4. Under the bed 5. Behind computer and TV screens.

When it comes to stage lighting you can use LED light strips in different ways. You can use diffused LED light strips to backlight screens and podiums. Bright RGB and LED neon lights can be used to highlight key areas of the stage. Luminous LED light strips can be used for backdrop and spotlight lighting.

If you're looking for your next DIY project, search no more—enhance your space with mood lighting for an aesthetic upgrade that can also improve your mood, sleep, and productivity.
