

Professional LED Light Manufacturer
For over 17 years

FEATURES & BENEFITS

- 3000K/4000K/6500K
- High Brightness Output
- The Light Strip Can Be Recessed Or Surface Mounted
- Installation Indoor Or Outdoor Available
- High Quality, Rest Assured Service
- salt Water Resistant
- Solvent Resistant
- Uv Resistant
- Flame Resistant

LED LIGHT STRIP

WJ-PLS-1707-White (Dual)-110V/220V

TECHNICAL INFORMATION

■ Light Strip Specifications

Model:	WJ-PLS-1707-White (Dual)-110V/220V
Material:	Eco-friendly PVC material
Bending direction:	Vertical
Working Mode:	Steady/Dimmable
Color:	3000K/4000K/6500K
Voltage:	AC110V/220V
Watts/M:	13W
Lumens/M:	1016.84LM
Cut Points:	100CM
Lifespan:	50000 hours

■ DESCRIPTION

An LED strip light is a flexible circuit board that is populated with LEDs that you can stick almost anywhere you want to add powerful lighting in a variety of colors and brightnesses. LED strip lights are flexible and can be bent vertically up to 90 degrees. There are 5 great spots for LED strip lights around your home: 1. Under cabinets 2. Along toe kicks 3. Under shelves 4. Under the bed 5. Behind computer and TV screens.

When it comes to stage lighting you can use LED light strips in different ways. You can use diffused LED light strips to backlight screens and podiums. Bright RGB and LED neon lights can be used to highlight key areas of the stage. Luminous LED light strips can be used for backdrop and spotlight lighting.

If you're looking for your next DIY project, search no more—enhance your space with mood lighting for an aesthetic upgrade that can also improve your mood, sleep, and productivity.
