GO ABOUT US

Guose is a professional company integrating design, production and after-sales service. The plant and equipment factory has a total area of 15,000 square meters and a production area of 7,500 square meters. It has a variety of advanced and complete production equipment. Professional technology and exclusive products have created a distinctive brand of national colors. In recent years, the company has been continuously improving its own strength and service level. In addition to implementing the 1809001-2015 quality management system certification, we continue to improve ourselves to meet the 5S standards and requirements, and obtain ISO9001, SGS, CE certification. Our company is committed to providing customers with first-class quality, efficient pre-sales and after-sales services, and has won a good reputation from customers all over the world, such as the Middle East, Australia, Africa, Southeast Asia, and Central America.

Foshan Nanhai Guose Intelligent Equipment Co., Ltd., established in 1996, started foreign trade business in 2011, and opened the first Alibaba foreign trade platform in 2013, specializing in the production of smart equipment. The main products include containers, shelters, light boxes, and signs. Brand, petrol station, anti-aircraft artillery, solar stool, sentry box, quarantine channel, etc. Possess a series of top equipment and technical skills such as engraving, sheet metal, welding, laser cutting, water cutting, UV printing, spray coating, etc.

After 24 years of development, we have more than 150 employees, including designers, business personnel, production personnel and management personnel. With a diligent team and a harmonious working atmosphere, our products are becoming more and more perfect and diversified, not only beautiful in appearance, but also practical in many fields. Provide customers with a full range of services with an enterprising and pragmatic attitude. From project conception, design, manufacturing, construction to installation, we will try our best to provide customers with the most scientific, reasonable and effective solutions. Believe us, the national container house is your first choice and the most ideal choice.

Guangang House

Our vision :

To be a top 100 company, products all over the world

Our mission :

Provide customers with the best, highest quality, most ideal, and most contemporary products

Our perspective :

Customer first, struggle first, teamwork, embrace change

ONE-STOP SERVICE

Goose can provide you with one-stop service. We can design according to customer requirements. We have strict quality control in the production process, and we can help customers arrange transportation to their local port or door-to-door delivery.

CONSTRUCTION

We can design drawings according to customer requirements. It includes floor plan, three views, renderings and so on. Our engineers can also analyze the structure according to customer needs, and then further optimize the engineering drawings to save customer costs.

CONTAINER SHOPS

The advantage of using containers as shops is that they can be easily moved to various places suitable for business operations, and it is convenient for operators to place shops according to the flow of people. On the other hand, the eye-catching shape of container shops will be easier to attract customers' attention, which is suitable for gas stations, service areas, commercial streets and other places, and container shops are cheap and cost-effective.

CONTAINER COFFEE SHOP

In terms of shape and function, container catering shops have a variety of options. The entire surface of the glass will appear taller, and the hydraulic opening and closing system will extend the use space, and the staircase can effectively use the balcony space on the second floor. , More choices, worth having.

RESTAURANT

Goose Containers are sold abroad, integrating product research and development, design, standard container production, product customization, sales, and after-sales. We are committed to providing customers with high-quality, cost-effective residential and commercial space solutions.

DORMITORY

Combining multiple LCL units together as staff dormitories, coupled with stairs, sunshade baffles and corridors, creates a comfortable and warm living environment.

ISOLATION CAMP

The interior of the isolation camp is divided into two independent rooms, and the toilets are respectively configured, which effectively plays the role of isolation and protection

SMALL MALL

The small shopping mall is composed of 6 containers connected together. In addition, the front has a decorative panel and a display screen, which is beautiful and atmospheric.

VENDING SHOP

It uses a 20-foot standard container, and uses glass sliding doors and floor-to-ceiling glass windows on the front, allowing people to see the furnishings at a glance. Decorative panels have also been added to make the entire product more eye-catching.

BAKERY SHOP

CONTAINER HOUSE

Using the combination of bottom two on top, three containers are combined. The first floor is the living room and the kitchen, the second floor is the bedroom and the balcony, and the balcony is composed of railings on the top of the first floor container, which can maximize the use of space. There is also an outdoor staircase at the back, so that you can go up to the bedroom on the second floor. In addition, the outer wall is made of wood grain decorative panels, which makes the whole appearance to a higher level.

CONTAINER OFFICE

The office is composed of six 20-foot containers. The outer wall is made of corrugated boards, and the doors and windows are made of glass sliding doors and floor-to-ceiling glass windows, making the field of vision broad. There are managers' rooms and staff offices on the first floor, conference rooms and lounges on the second floor, and a large balcony for employees to rest and activities. In addition, there is a corridor on the first floor to keep out the wind, rain and sun.

CONTAINER HOUSE

There are many exterior wall styles of residential containers, which can be selected according to personal preferences. The installation of solar energy devices on the top truly achieves environmental protection and energy saving, and meets the requirements of contemporary green life.

Residential containers can be single or multiple combinations to meet different needs.

CONTAINER CONVENIENCE STORE

➤ This type of container convenience store can be used as a supporting facility for a petrol station, and can also be used in expressway service areas.

CATERING SHOPS

➤ Several boxes are merged together in the way of connecting boxes to maximize the use of space efficiency. Using the space of the second-story balcony can accommodate more people. The exterior walls are glass, metal carved panels, and bamboo and wood fiber integrated wall panels. Wait for different options.

➤ Different exterior wall panel renderings

Xingang House

RESTAURANT SERIES

The advantages of installing rolling gates all around are: when all rolling gates are open, the indoor air is very circulated, and the view is also very open. When all rolling gates are closed, the safety of the entire building is greatly guaranteed.

COMMERCIAL AND RESIDENTIAL DUAL-USE SERIES

The first floor is a commercial space, the second floor is a residential space, and then there is an open-air large balcony. This assembled structure can meet the placement needs of different venues and can truly achieve multiple uses of a room.

OFFICE

The first floor is used as an office area, and the second floor is used as a leisure and entertainment area, allowing you to relax appropriately while working.

STUDIO SERIES

A studio is generally established by several people or one person. It is a creative work space. The scale does not need to be too large, but it must be exquisite and unique. Using a container as a hair styling studio is itself a creative space. Although the volume is small, the form of expression is extremely colorful.

The container studio is simple and generous in shape, diverse in functions, and environmentally friendly, which is very suitable for small businesses or people engaged in creative industries for space, appearance and practicality.

PANTRY

MORE DESIGNS...

Containers have long surpassed the scope of transportation tools. They have been designed by environmentalists and creative people with great brains into a variety of ingenious living spaces, creating a new way of life and living for people.

Folding container is a typical modular house, which is quick to install and widely used in many fields.

MORE DETAILS

1. Rock wool insulation wallboard is antibacterial and easy to clean
2. Select high-quality steel, process and produce
3. Thickened steel frame
4. Every welding place has been carefully polished
5. High-quality hardware accessories make the frame more stable and strong

Three View

Front view

Rear view

Side view

Installation process

1. The cabinet is in a fully folded state.

2. Hang the hook into the upper lifting hole and lift it up steadily, and the box body will gradually unfold.

3. At this time, the frame around the box is fully unfolded, just lift the two front and back walls at the bottom and push it up. (Be careful to remove the hook after all the cabinets are installed)

Feature:

It is easy to assemble and can be moved frequently. The important thing is that it has a sufficiently large usable area and spacious living space. All accessories have been assembled in the factory. The house can be folded to save space during transportation. When transported to the destination, it can be installed quickly and easily on the ground.

MORE DETAILS

Reasonable design, can be used repeatedly

Cost saving, can be disassembled and re-used many times

The house design is beautiful and general, and the decoration effect is good

Wide application, can be used in construction sites, villas, resorts, schools, etc.

POST SERIES

The container newsstand is a non-standard product and can be customized. It is suitable for parks, streets, community centers and other places. It covers a small area, has a large space for use, and is easy to move. Container newsstands are highly practical. We can purchase newspapers, books, beverages, snacks and other common daily necessities through the container newsstands.

MORE DESIGNS

Xingta

Small public toilets are indispensable facilities in urban blocks, factories, tourist attractions, farms, and project bases. Public toilets have relatively high requirements for the mobility of facilities. In addition, the functions of firmness, wind resistance, heat preservation and heat insulation cannot be ignored. Container construction can well meet the above needs.

The container toilet is a brand-new environmental protection concept. It takes the container as the main body and can be easily and quickly disassembled. The container toilet can be moved anytime and anywhere according to the changes in the number of tourists, and has its own sewage treatment system. It has the advantages of strong adaptability, strong creativity, low price, low carbon and environmental protection, convenient movement and high safety. Compared with traditional toilets in scenic spots, container toilets have strong adaptability advantages.
